U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No.

Application/Control Number: 09/447,023

Art Unit: 1761

## **DETAILED ACTION**

## Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-52, 58-65, drawn to a method of cultivating cranberries to a particular phase development denoted by the level of citric acid, or the anthocyanin level, classified in class 426, subclass 599.
  - II. Claims 53-57, drawn to a method of adding a color retarding agent to the cranberry, classified in class 426, subclass 93.
  - III. Claims 69, drawn to producing a food product containing infused husks of YellowBell cranberries, classified in class 426, subclass 289.
  - .IV Claims 66-68, 70- 84, drawn to a cranberry food product and method of making, classified in class 426, subclass 615.
- 2. The inventions are distinct, each from the other because of the following reasons:

  Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method for cultivating cranberries with a particular citric acid level.. See MPEP § 806.05(d).
- 3. Inventions I, II, III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different

Application/Control Number: 09/447,023

Art Unit: 1761

functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions in that claim 69 is to an infused husk of Yellow Bell cranberries, and the other two Groups are to methods of cultivating cranberries to obtain a particular color and acid level.

Group IV is to the juice from the Yellow Bell cranberry and other products and doesn't require the husk (in some cases) or the methods of cultivating to a particular citric acid level or anthocyanin level.

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups I, III, IV, restriction for examination purposes as indicated is proper.
- 6. A telephone call was not made to request an oral election to the above restriction requirement, because of the complexity of the restriction.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1761

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Helen Pratt whose telephone number is (703) 308-1978.
